Oil and Gas Lease Mapping

DMS provided contract lease mapping services to EnCana Oil and Gas from our Corpus Christi office or when requested, an analyst was sent to EnCana's office to work on site. EnCana provided their lease data in PDF format and lease reports were provided in MS Excel spreadsheets. Through the use of metes and bounds descriptions, legal descriptions, ownership GIS layers, and geo-rectifying lease maps/plats for heads-up digitizing, DMS was able to create lease

polygons, numbering to approximately 2,300 leases to date.
